

Protesi in monofilamento di polipropilene | Protesi non assorbibile in monofilamento di polipropilene ad **STANDARD** 90 gr/m2
Monofilament polypropylene implant | **STANDARD**, non-absorbable monofilament polypropylene 90 gr/m2 mesh
Prótesis de polipropileno monofilamento | Prótesis de polipropileno monofilamento no absorbible de **ESTÁNDAR** 90 g/m2

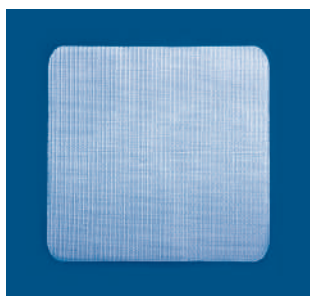

Ergomesh® è indicata per la riparazione di difetti della parete addominale e toracica che richiedano un sostegno mediante materiale di rinforzo o di riempimento interstiziale; può essere adattata a diversi tipi di ernioplastica. Il dispositivo può essere utilizzato sia in open surgery che in laparoscopia.

Ergomesh® is indicated for the repair of abdominal and thoracic wall defects requiring support through reinforcement or interstitial filling material; it can be adapted to different types of hernioplasty. The device can be used in both open surgery and laparoscopy.

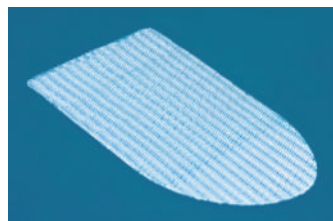

Ergomesh® está indicada para la reparación de defectos de la pared abdominal y torácica que requieren soporte con material de refuerzo o relleno intersticial; puede adaptarse a diferentes tipos de hernioplastia. El dispositivo puede ser utilizado tanto en cirugía abierta como en laparoscopia.
